

Thank you for agreeing to playtest for me!

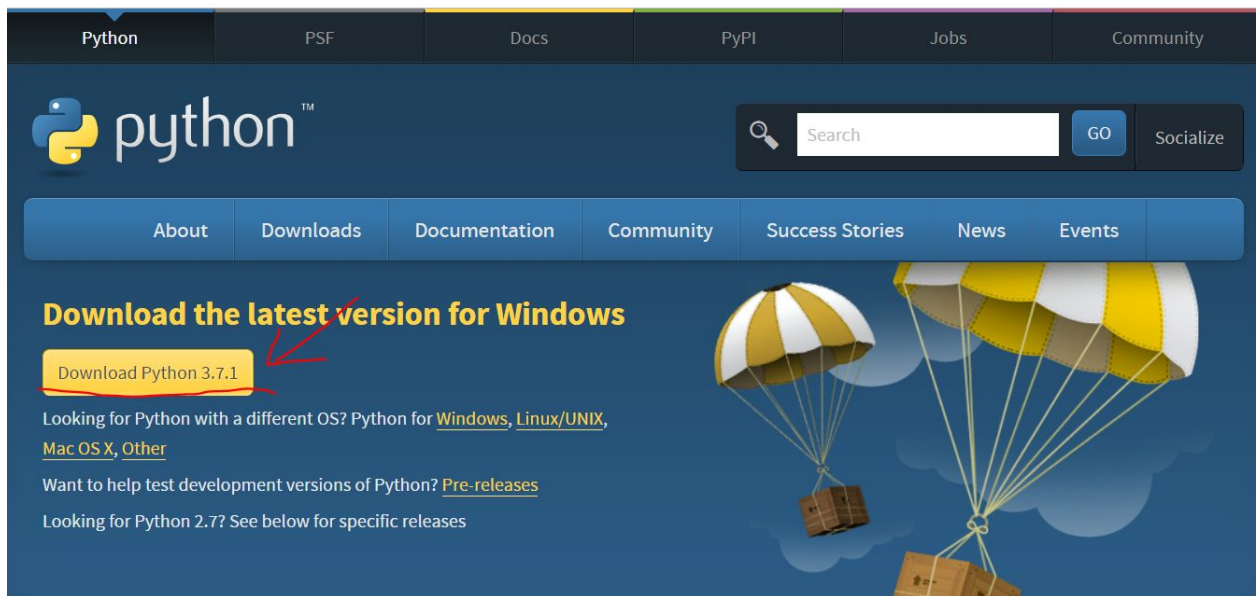

As this game is still in the Alpha stages, playtesting requires a small amount of technical competence and the ability to follow instructions. If you do not feel up to the task, please do not hesitate to let me know and bow out.

Instructions

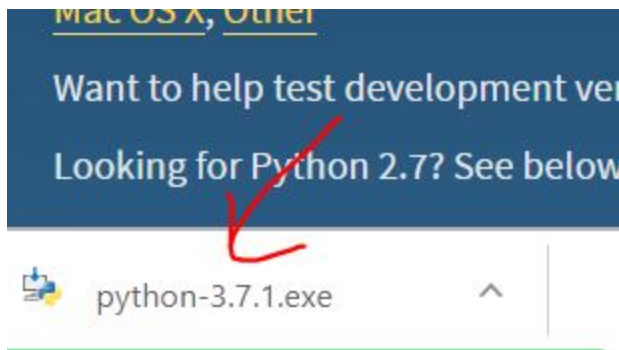

Installing Python

This game has not yet been compiled into an executable and so will need Python installed on your computer to run. Python is a free programming language used by many companies primarily for automation. Installing it will only give you the ability to run and create .PY files. It is not a stand-alone Application.

- 1) Download Python 3.7.1 (or latest) from <https://www.python.org/downloads/>

- 2) After download is complete, click to open downloaded .EXE file.

- 3) When running installer, check the box **Add Python 3.7 to PATH** (indicated by the arrow), then click **Install Now** (Note: You may be prompted for your administrator password. This is normal. You are merely being asked to let Python run .PY files.) This installation should be over in a matter of seconds, but if it is not, that merely means that your computer is slow, like mine.

- 4) After installation, the next step will be to download the .zip file I have in this Google Drive directory.

amaryllisninja ww51.6 update Latest commit 729b494 a minute ago

- 5) Unzip this directory into a contained folder. If you do not have an unzipping application, consider downloading 7Zip from <https://www.7-zip.org/download.html>, as it is free to use.

- 6) Press your Windows Key and search for **Idle**. You should get a result similar to this one, which you will open.

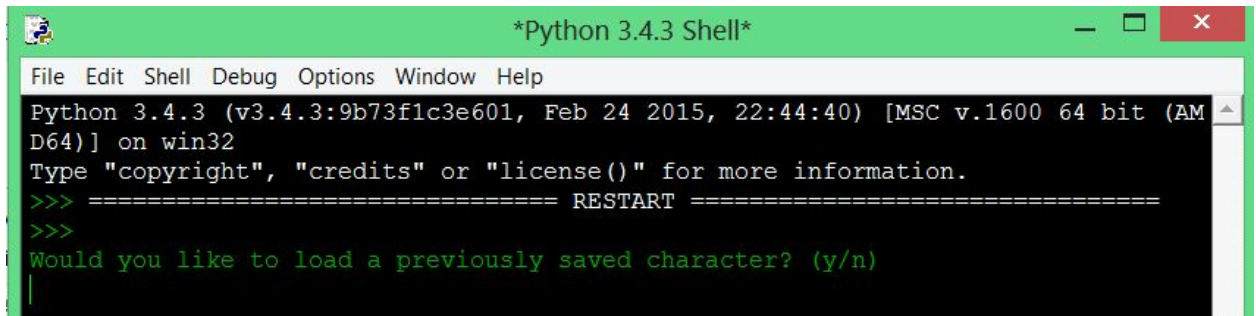

- 7) Once you have opened Idle, click **File -> Open...**

- 8) Navigate to the folder you unzipped the Python RPG... .zip into and open the **gameFile.py** file.

- 11) Press the Windows Key and search for **Snipping**. This will bring up an application that you can use to take a screen capture of the failure you received.

Thank you for your time and good luck!

If you would like to have an NPC in your honor, please write down in a Notepad the name you would like, what kind of NPC you would prefer, and maybe a few catch-phrases and a description.
